

Practical No. 9

Title

Charts for Visual Presentation in Spreadsheet

Project 9: AI Health Dashboard

Objective

Monitor healthy lifestyle habits.

Tasks

- Create a worksheet named **Health Dashboard**.
- Record daily:
 - Water Intake
 - Sleep Hours
 - Exercise
 - Screen Time
- Ask AI:
"Suggest healthy daily targets for college students."
- Create charts to visualize weekly progress.

Learning Outcome (LLO)

- **LLO 9.1:** Create charts using various chart options in a spreadsheet.

Aim

To create and format different types of charts in Microsoft Excel (or LibreOffice Calc) for visual presentation of data.

Requirements

- Desktop/Laptop Computer
- Microsoft Excel / LibreOffice Calc

Step 1: Open Spreadsheet Software

1. Click the **Start** button.
2. Open **Microsoft Excel** (or **LibreOffice Calc**).
3. Click **Blank Workbook**.

Step 2: Save the Workbook

1. Press **Ctrl + S**.
2. Select the **Documents** folder.
3. Enter the file name:

Practical 9

4. Click **Save**.

Step 3: Enter the Following Data

Student Marks

Amit 85

Sneha 92

Rahul 76

Priya 88

Neha 95

Step 4: Select the Data

1. Select the complete table including the headings.
2. Ensure both **Student** and **Marks** columns are selected.

Part A: Create a Column Chart

Step 5: Insert a Column Chart

1. Click the **Insert** tab.
2. Click **Column or Bar Chart**.
3. Select **Clustered Column**.
4. The chart will appear on the worksheet.

Step 6: Add a Chart Title

1. Click the chart title.
2. Type:

Student Marks

Step 7: Move the Chart

1. Click the chart.
2. Drag it to a suitable location on the worksheet.

Step 8: Resize the Chart

1. Click the chart.
2. Drag the corner handles to increase or decrease its size.

Part B: Create a Pie Chart

Step 9: Create a Pie Chart

1. Select the data again.
2. Click **Insert**.
3. Click **Pie Chart**.
4. Select **2-D Pie**.

Step 10: Add Data Labels

1. Click the pie chart.
2. Click the + (**Chart Elements**) button or **Chart Design**.
3. Select **Data Labels**.
4. The marks will be displayed on the chart.

Part C: Create a Bar Chart

Step 11: Insert a Bar Chart

1. Select the data.
2. Click **Insert**.
3. Click **Bar Chart**.
4. Select **Clustered Bar**.

Part D: Create a Line Chart

Step 12: Insert a Line Chart

1. Select the data.
2. Click **Insert**.
3. Click **Line Chart**.

4. Select **Line with Markers**.

Part E: Change Chart Style

Step 13: Apply a Chart Style

1. Click any chart.
2. Click the **Chart Design** tab.
3. Select any **Chart Style**.

Step 14: Change Chart Colors

1. Click the chart.
2. Click **Change Colors**.
3. Select any color combination.

Step 15: Save the Workbook

1. Press **Ctrl + S**.
2. Close the workbook.
